

INTERNATIONAL
REVIEW OF CELL AND
MOLECULAR BIOLOGY

Volume 314

Edited by

KWANG W. JEON

University of Tennessee, Knoxville, TN, U.S.A.

International Review of Cell and Molecular Biology presents current advances and comprehensive reviews in cell and molecular biology — both plant and animal. Articles address structure and control of gene expression, nucleocytoplasmic interactions, control of cell development and differentiation, and cell transformation and growth. Authored by some of the foremost scientists in the field, each volume provides up-to-date information and directions for future research.

Praise for the Series

"Should be on the shelf of any biomedical library"

DOODY'S

"Maintains the tradition and set-up of the previous volumes and certainly provides up-to-date data on varied aspects of cell and molecular biology...a valuable acquisition to any library."

THE NUCLEUS

Contents include

- Epidermal Growth Factor Signaling in Transformed Cells
- New Insights into Antimetastatic and Antiangiogenic Effects of Cannabinoids
- Insight into the Role of Wnt5a-Induced Signaling in Normal and Cancer Cells
- New Insight into Cancer Aneuploidy in Zebrafish
- The Amazing Ubiquitin-Proteasome System: Structural Components and Implication in Aging
- Biogenesis and Function of the NGF/TrkA Signaling Endosome
- Multiple Myeloma as a Model for the Role of Bone Marrow Niches in the Control of Angiogenesis
