

Contents

The convoluted evolution of eukaryotes with complex plastids

F. Burki

Let there be light: a contemporary primer on primary plastid endosymbiosis

D.R. Smith

Secondary plastids of stramenopiles

R.G. Dorrell, C. Bowler

Plastid complexity in dinoflagellates: a picture of gains, losses, replacements and revisions

R.F. Waller, L. Kořenyš

The dark side of the chloroplast: biogenesis, metabolism and membrane biology of the apicoplast

G.G. van Dooren, S.V. Hapuarachchi

Chromerids and their plastids

Z. Füssy, M. Oborník

Biology of haptophytes: complicated cellular processes driving the global carbon cycle

Y. Tsuji, M. Yoshida

Cryptomonads - a model organism sheds light on the evolutionary history of genome reorganization in secondary endosymbioses

G. Tanifuji, N. Onodera

Secondary plastids of euglenophytes

A.M.G. Vanclová, L. Hadariová, Š. Hrdá, V. Hampl

Chlorarachniophytes with complex secondary plastids of green algal origin

Y. Hirakawa
