

Volume 92

Advances in GENETICS

Serial Editors

Theodore Friedmann University of California at San Diego, School of Medicine, USA

Jay C. Dunlap Dartmouth Medical School, Hanover, NH, USA

Stephen F. Goodwin University of Oxford, Oxford, UK

The field of genetics is rapidly evolving, and new medical breakthroughs are occurring as a result of advances in knowledge gained from genetics research. **Advances in Genetics** continually publishes important, timely reviews from leaders in the field that cover a broad range of topics of interest to geneticists and their colleagues in affiliated disciplines. This volume includes articles on:

- Understanding and Editing the Zebrafish Genome
- Life Without Food and the Implications for Neurodegeneration
- Decoding Advances in Psychiatric Genetics: a Focus on Neural Circuits in Rodent Models
- Around the Fungal Clock: Recent Advances in the Molecular Study of Circadian Clocks in *Neurospora* and Other Fungi

Praise for Advances in Genetics:

"Outstanding both in variety and in the quality of its contributions." —

NATURE

"Can be highly recommended to geneticists, and biologists in general..."

will prove to be of high importance for the development of the science of genetics." —
