

Volume 94

Advances in GENETICS

Serial Editors

Theodore Friedmann

University of California at San Diego, School of Medicine, CA, USA

Jay Dunlap

The Geisel School of Medicine at Dartmouth, Hanover, NH, USA

Stephen Goodwin

University of Oxford, Oxford, UK

The field of genetics is rapidly evolving, and new medical breakthroughs are occurring as a result of advances in knowledge gained from genetics research. **Advances in Genetics** continually publishes important, timely reviews from leaders in the field that cover a broad range of topics of interest to geneticists and their colleagues in affiliated disciplines. This volume includes articles on:

- Diversity of Entomopathogenic Fungi: Which Groups Conquered the Insect Body?
- Utilizing Genomics to Study Entomopathogenicity in the Fungal Phylum *Entomophthoromycota*: A Review of Current Genetic Resources
- Advances in Genomics of Entomopathogenic Fungi
- Insect Pathogenic Fungi as Endophytes
- Genetically Engineering Entomopathogenic Fungi
- Molecular Genetics of *Beauveria bassiana* Infection of Insects
- Insect Immunity to Entomopathogenic Fungi
- Diseases Dynamics in Ants: A Critical Review of the Ecological Relevance of Using Generalist Fungi to Study Infections in Insect Societies
- Entomopathogenic Fungi: New Insights into Host-Pathogen Interactions
- Molecular Genetics of Secondary Chemistry in *Metarhizium* Fungi
- From So Simple a Beginning: The Evolution of Behavioral Manipulation by Fungi

Praise for **Advances in Genetics**:

"Outstanding both in variety and in the quality of its contributions."—

NATURE

"Can be highly recommended to geneticists, and biologists in general...

will prove to be of high importance for the development of the science of genetics."—
