

INTERNATIONAL
REVIEW OF CELL AND
MOLECULAR BIOLOGY

Volume 321

Edited by

KWANG W. JEON

University of Tennessee, Knoxville, TN, USA

International Review of Cell and Molecular Biology presents current advances and comprehensive reviews in cell and molecular biology—both plant and animal. Articles address structure and control of gene expression, nucleocytoplasmic interactions, control of cell development and differentiation, and cell transformation and growth. Authored by some of the foremost scientists in the field, each volume provides up-to-date information and directions for future research.

Praise for the Series

"Should be on the shelf of any biomedical library"

DOODY'S

"Maintains the tradition and set-up of the previous volumes and certainly provides up-to-date data on varied aspects of cell and molecular biology...a valuable acquisition to any library."

THE NUCLEUS

Contents include

- Evolution, Regulation and Function of N-terminal Variable Region of Troponin T: Modulation of Muscle Contractility and Beyond
- Phosphatidylethanolamine Metabolism in Health and Disease
- Microtubule Dynamics in Neuronal Development, Plasticity and Neurodegeneration
- Fish Chromatophores – From Molecular Motors to Animal Behavior
- Molecular Breeding of *Sorghum bicolor*: A Novel Energy Crop
- Cell-Nonautonomous Mechanisms Underlying Cellular and Organismal Aging
- OSBP-Related Protein Family: Mediators of Lipid Transport and Signaling at Membrane Contact Sites
