

Volume 95

Advances in GENETICS

Serial Editors

Theodore Friedmann

University of California at San Diego, School of Medicine, CA, USA

Jay Dunlap

The Geisel School of Medicine at Dartmouth, Hanover, NH, USA

Stephen Goodwin

University of Oxford, Oxford, UK

The field of genetics is rapidly evolving, and new medical breakthroughs are occurring as a result of advances in knowledge gained from genetics research. **Advances in Genetics** continually publishes important, timely reviews from leaders in the field that cover a broad range of topics of interest to geneticists and their colleagues in affiliated disciplines. This volume includes articles on:

- Studying the Evolution of the Vertebrate Circadian Clock: The Power of Fish as Comparative Models
- Genomic and Transcriptomic Approaches to Study Cancer in Small Aquarium Fish Models
- Gal4 Driver Transgenic Zebrafish: Powerful Tools to Study Developmental Biology, Organogenesis and Neuroscience
- Whole-Organism Cellular Pathology: A Systems Approach to Phenomics
- Evolutionary Genetics of the Cavefish *Astyanax mexicanus*
- Transcriptional Regulation During Zygotic Genome Activation in Zebrafish and Other Anamniote Embryos
- The Zebrafish as Model for Deciphering the Regulatory Architecture of Vertebrate Genomes
- Transcriptomic Approaches in the Zebrafish Model for Tuberculosis – Insights Into Host- and Pathogen-specific Determinants of the Innate Immune Response

Praise for Advances in Genetics:

"Outstanding both in variety and in the quality of its contributions." —

NATURE

"Can be highly recommended to geneticists, and biologists in general."

will prove to be of high importance for the development of the science of genetics." —
