

INTERNATIONAL
REVIEW OF CELL AND
MOLECULAR BIOLOGY

Volume 327

Edited by

KWANG W. JEON

University of Tennessee, Knoxville, TN, U.S.A.

LORENZO GALLUZZI

Weill Cornell Medical College, New York, NY, U.S.A.

International Review of Cell and Molecular Biology presents current advances and comprehensive reviews in cell and molecular biology—both plant and animal. Articles address structure and control of gene expression, nucleocytoplasmic interactions, control of cell development and differentiation, and cell transformation and growth. Authored by some of the foremost scientists in the field, each volume provides up-to-date information and directions for future research.

Praise for the Series

"Should be on the shelf of any biomedical library"

DOODY'S

"Maintains the tradition and set-up of the previous volumes and certainly provides up-to-date data on varied aspects of cell and molecular biology...a valuable acquisition to any library."

THE NUCLEUS

Contents include

- Sensing the Environment Through Sestrins: Implications for Cellular Metabolism
- Metabolic Regulation of Apoptosis in Cancer
- A Mechanistic Approach to the Development of Gene Therapy for Chronic Pain
- Roles and Regulation of Epithelial Splicing Regulatory Proteins 1 and 2 in Epithelial-Mesenchymal Transition
- Orchestrating Lymphocyte Polarity in Cognate Immune Cell-Cell Interactions
- The Process of Cornification Evolved from the Initial Keratinization in the Epidermis and Epidermal Derivatives of Vertebrates: A New Synthesis and the Case of Sauropsids
- The Calcium-Sensing Receptor in Health and Disease
- Molecular Interactions Between Flowering Time and Abiotic Stress Pathways
