

INTERNATIONAL REVIEW OF CELL AND MOLECULAR BIOLOGY

Volume 324

Edited by

KWANG W. JEON

University of Tennessee, Knoxville, TN, U. S. A.

International Review of Cell and Molecular Biology presents current advances and comprehensive reviews in cell and molecular biology—both plant and animal. Articles address structure and control of gene expression, nucleocytoplasmic interactions, control of cell development and differentiation, and cell transformation and growth. Authored by some of the foremost scientists in the field, each volume provides up-to-date information and directions for future research.

Praise for the Series

“Should be on the shelf of any biomedical library”

DOODY’S

“Maintains the tradition and set-up of the previous volumes and certainly provides up-to-date data on varied aspects of cell and molecular biology...a valuable acquisition to any library.”

THE NUCLEUS

Contents include

- Cytokinin Synthesis, Signaling and Function - Advances and New Insights
- Emergent Synapse Organizers: LAR-RPTPs and their Companions
- Engineering Human Microbiota: Influencing Cellular and Community Dynamics for Therapeutic Applications
- New Insights into the Role of RNA-binding Proteins in the Regulation of Heart Development
- Roles of Tetratricopeptide Repeat Proteins in Biogenesis of Photosynthetic Apparatus
- Role of Long Noncoding RNAs in Neoplasia: Special Emphasis on Prostate Cancer
