

INTERNATIONAL REVIEW OF CELL AND MOLECULAR BIOLOGY

Volume 322

Edited by

KWANG W. JEON

University of Tennessee, Knoxville, TN, U.S.A.

International Review of Cell and Molecular Biology presents current advances and comprehensive reviews in cell and molecular biology—both plant and animal. Articles address structure and control of gene expression, nucleocytoplasmic interactions, control of cell development and differentiation, and cell transformation and growth. Authored by some of the foremost scientists in the field, each volume provides up-to-date information and directions for future research.

Praise for the Series

"Should be on the shelf of any biomedical library."

DOODY'S

"Maintains the tradition and set-up of the previous volumes and certainly provides up-to-date data on varied aspects of cell and molecular biology...a valuable acquisition to any library."

THE NUCLEUS

Contents include

- New Insights into Mechanisms and Functions of Nuclear Size Regulation
- Rho Signaling in *Dictyostelium discoideum*
- Building Blocks of Functioning Brain: Cytoskeletal Dynamics in Neuronal Development
- Membrane Trafficking in Neuronal Development: Ins and Outs of Neural Connectivity
- Leukocytes Crossing the Endothelium: a Matter of Communication
- Membrane Dynamics and Signaling of the Coxsackievirus and Adenovirus Receptor
- Catecholaminergic System of Invertebrates: Comparative and Evolutionary Aspects in Comparison with the Octopaminergic System
