

Advances in Virus Research – Volume 97

Edited by

Margaret Kielian, Thomas C. Mettenleiter and Marilyn J. Roossinck

Cover illustration: An artist's rendering of a new biomaterial created by encapsulating a hydrogen-producing enzyme within a Virus-like particle (VLP). Courtesy of Indiana University.

Contents

Biomedical and Catalytic Opportunities of Virus-like Particles in Nanotechnology

B. Schwarz, M. Uchida and T. Douglas

A Renaissance in Nepovirus Research Provides New Insights into their Molecular Interface with Hosts and Vectors

M. Fuchs, C. Schmitt-Keichinger and H. Sanfaçon

Have NEC Coat, will Travel: Structural Basis of Membrane Budding During Nuclear Egress in Herpesviruses

J.M. Bigalke and E.E. Heldwein

Nonsegmented Negative-Sense RNA Viruses – Structural Data Bring New Insights into Nucleocapsid Assembly

M. Jamin and F. Yabukarski

Modified Vaccinia Virus Ankara – History, Value in Basic Research, and Current Perspectives for Vaccine Development

A. Volz and G. Sutter
