

INTERNATIONAL
REVIEW OF CELL AND
MOLECULAR BIOLOGY

Volume 335

Edited by

FRIEDEMANN LOOS

Centre de Recherche des Cordeliers de Jussieu, Paris, France

International Review of Cell and Molecular Biology presents current advances and comprehensive reviews in cell and molecular biology—both plant and animal. Articles address structure and control of gene expression, nucleocytoplasmic interactions, control of cell development and differentiation, and cell transformation and growth. Authored by some of the foremost scientists in the field, each volume provides up-to-date information and directions for future research.

Praise for the Series

"Should be on the shelf of any biomedical library"

DOODY'S

"Maintains the tradition and set-up of the previous volumes and certainly provides up-to-date data on varied aspects of cell and molecular biology...a valuable acquisition to any library."

THE NUCLEUS

Contents include

- Histone Variants and Disease
- NF- κ B and the Transcriptional Control of Inflammation
- Alternative Splicing in Genetic Diseases: Improved Diagnosis and Novel Treatment Options
- Transcriptional Regulation of Metabolism by SIRT1 and SIRT7
- Regulation of Gene Transcription Following Stimulation of Transient Receptor Potential (TRP) Channels
- Transcription: Insights From the HIV-1 Promoter
