

INTERNATIONAL REVIEW OF CELL AND MOLECULAR BIOLOGY

Volume 331

Edited by

LORENZO GALLUZZI

Weill Cornell Medical College, New York, NY, U.S.A.

International Review of Cell and Molecular Biology presents current advances and comprehensive reviews in cell and molecular biology — both plant and animal. Articles address structure and control of gene expression, nucleocytoplasmic interactions, control of cell development and differentiation, and cell transformation and growth. Authored by some of the foremost scientists in the field, each volume provides up-to-date information and directions for future research.

Praise for the Series

"Should be on the shelf of any biomedical library"

DOODY'S

"Maintains the tradition and set-up of the previous volumes and certainly provides up-to-date data on varied aspects of cell and molecular biology...a valuable acquisition to any library."

THE NUCLEUS

Contents include

- Breast Cancer Immunology and Immunotherapy: Current Status and Future Perspectives
- New Insights into Cellular Stress Responses to Environmental Metal Toxicants
- An Update on Src Family of Nonreceptor Tyrosine Kinases Biology
- STAT Transcription Factors in T Cell Control of Health and Disease
- Chemokine Receptor Signaling and the Hallmarks of Cancer
- Mitochondrion: A Common Organelle for Distinct Cell Deaths?
- Antibody-Based Cancer Therapy: Successful Agents and Novel Approaches
