

INTERNATIONAL
REVIEW OF CELL AND
MOLECULAR BIOLOGY

Volume 332

Edited by

LORENZO GALLUZZI

Weill Cornell Medical College, New York, NY, U.S.A.

International Review of Cell and Molecular Biology presents current advances and comprehensive reviews in cell and molecular biology—both plant and animal. Articles address structure and control of gene expression, nucleocytoplasmic interactions, control of cell development and differentiation, and cell transformation and growth. Authored by some of the foremost scientists in the field, each volume provides up-to-date information and directions for future research.

Praise for the Series

"Should be on the shelf of any biomedical library"

DOODY'S

"Maintains the tradition and set-up of the previous volumes and certainly provides up-to-date data on varied aspects of cell and molecular biology...a valuable acquisition to any library."

THE NUCLEUS

Contents include

- Metabolic Alterations at the Crossroad of Aging and Oncogenesis
- Cellular and Molecular Mechanisms of Autoimmunity and Lupus Nephritis
- Old and Novel Functions of Caspase-2
- Metabolic Reprogramming and Oncogenesis: One Hallmark, Many Organelles
- Molecular Biology Digest of Cell Mitophagy
- Regulation of Cell Calcium and Role of Plasma Membrane Calcium ATPases
- Emerging Mechanisms and Roles for Asymmetric Cytokinesis
