

INTERNATIONAL  
REVIEW OF CELL AND  
MOLECULAR BIOLOGY

Volume 336

Edited by  
**LORENZO GALLUZZI**

*Weill Cornell Medical College, New York, NY, United States*

**International Review of Cell and Molecular Biology** presents current advances and comprehensive reviews in cell and molecular biology—both plant and animal. Articles address structure and control of gene expression, nucleocytoplasmic interactions, control of cell development and differentiation, and cell transformation and growth. Authored by some of the foremost scientists in the field, each volume provides up-to-date information and directions for future research.

*Praise for the Series*

"Should be on the shelf of any biomedical library."

DOODY'S

"Maintains the tradition and set-up of the previous volumes and certainly provides up-to-date data on varied aspects of cell and molecular biology...a valuable acquisition to any library."

THE NUCLEUS

*Contents include*

- Membrane trafficking in autophagy
- Targeting the metabolism of leukemic cells
- Autophagic flux in Alzheimer's disease
- Transcriptional alterations associated with celiac disease
- Regulation of antitumor immunity by IDO1
- Loss of nuclear integrity as an emerging hallmark of pathology
- Mechanisms of cortical differentiation
