

INTERNATIONAL
REVIEW OF CELL AND
MOLECULAR BIOLOGY

Volume 342

Edited by

NILS-PETTER RUDQVIST AND LORENZO GALLUZZI

Weill Cornell Medical College, New York, NY, United States

International Review of Cell and Molecular Biology presents current advances and comprehensive reviews in cell and molecular biology — both plant and animal. Articles address structure and control of gene expression, nucleocytoplasmic interactions, control of cell development and differentiation, and cell transformation and growth. Authored by some of the foremost scientists in the field, each volume provides up-to-date information and directions for future research.

Praise for the Series

"Should be on the shelf of any biomedical library"

DOODY'S

"Maintains the tradition and set-up of the previous volumes and certainly provides up-to-date data on varied aspects of cell and molecular biology...a valuable acquisition to any library."

THE NUCLEUS

Contents include

- Stimulating T Cells Against Cancer With Agonist Immunostimulatory Monoclonal Antibodies
- T Cells and Regulated Cell Death: Kill or Be Killed
- Macrophages: Their Untold Story in T Cell Activation and Function
- Metabolism of T Lymphocytes in Health and Disease
- Cancer Immunosurveillance by T Cells
- T Lymphocytes as Measurable Targets of Protection and Vaccination Against Viral Disorders
- In Silico Methods for Studying T Cell Biology
