

INTERNATIONAL
REVIEW OF CELL AND
MOLECULAR BIOLOGY

Volume 341

Edited by

NILS RUDQVIST AND LORENZO GALLUZZI

Weill Cornell Medical College, New York, NY, United States

International Review of Cell and Molecular Biology presents current advances and comprehensive reviews in cell and molecular biology—both plant and animal. Articles address structure and control of gene expression, nucleocytoplasmic interactions, control of cell development and differentiation, and cell transformation and growth. Authored by some of the foremost scientists in the field, each volume provides up-to-date information and directions for future research.

Praise for the Series

"Should be on the shelf of any biomedical library"

DOODY'S

"Maintains the tradition and set-up of the previous volumes and certainly provides up-to-date data on varied aspects of cell and molecular biology...a valuable acquisition to any library."

THE NUCLEUS

Contents include

- Transcriptional Programs Underlying T-cell Differentiation and Function
- Surface Phenotypes of CD8+ and CD4+ T Cells
- T Lymphocytes and Autoimmunity
- Molecular Mechanisms Underlying Pharmacological Immunosuppression
- T Lymphocyte-based Immunotherapeutics
