

Contents

Preface

Francisco M. Cánovas

1. Genomics of forest trees

Nathaniel Robert Street

2. Resources for conifer functional genomics at the omics era

Rafael A. Cañas, M. Belén Pascual, Fernando N. de la Torre, Concepción Ávila and Francisco M. Cánovas

3. The ectomycorrhizal contribution to tree nutrition

Adeline Becquer, Carmen Guerrero-Galán, Janice L. Eibenstein, Gabriella Houdinet, Heike Bücking, Sabine D. Zimmermann and Kevin García

4. Nitrogen storage and cycling in trees

Gen Li and Gary D. Coleman

5. Embryology in conifers

Sara von Arnold, David Clapham and Malin Abrahamsson

6. Activity of the shoot apical and cambial meristems: Coordination and responses to environmental signals

Rita Teresa Teixeira, Xiaoyan Sheng and Amy M. Brunner

7. Digging in wood: New insights in the regulation of wood formation in tree species

Eduardo L.O. Camargo, Raphaël Ployet, Hua Cassan-Wang, Fabien Mounet and Jacqueline Grima-Pettenati

8. Cell wall pectins in tree growth and woody biomass utilization

Scott A. Harding and Chung-Jui Tsai

9. Applications of transgenic approaches in developing an understanding of drought tolerance in poplar

Edward G. Kirby and Juan-Jesús Molina-Rueda

10. Phytoremediation with trees

Luis Gómez, Angela Contreras, David Bolonio, Julia Quintana, Luis Oñate-Sánchez and Irene Merino

Cover Image: (Left) A singular maritime pine tree named "Pino del escobón" in Teruel (Spain). (Right) Poplars planted at high-density for phytoremediation studies (Gómez et al., this book).
