

INTERNATIONAL
REVIEW OF CELL AND
MOLECULAR BIOLOGY

Volume 345

Edited by

CLAIRE VANPOUILLE-BOX and LORENZO GALLUZZI

Weill Cornell Medical College, New York, NY, United States

International Review of Cell and Molecular Biology presents current advances and comprehensive reviews in cell and molecular biology—both plant and animal. Articles address structure and control of gene expression, nucleocytoplasmic interactions, control of cell development and differentiation, and cell transformation and growth. Authored by some of the foremost scientists in the field, each volume provides up-to-date information and directions for future research.

Praise for the Series

"Should be on the shelf of any biomedical library"

DOODY'S

"Maintains the tradition and set-up of the previous volumes and certainly provides up-to-date data on varied aspects of cell and molecular biology...a valuable acquisition to any library."

THE NUCLEUS

Contents include

- Discrimination Between Self and Non-Self-Nucleic Acids by the Innate Immune System
- Intracellular RNA Sensing in Mammalian Cells: Role in Stress Response and Cancer Therapies
- Negative Regulation of Cytosolic Sensing of DNA
- Nucleic Acid Sensing Perturbation: How Aberrant Recognition of Self-Nucleic Acids May Contribute to Autoimmune and Autoinflammatory Diseases
- Common Differences: The Ability of Inflammasomes to Distinguish Between Self and Pathogen Nucleic Acids During Infection
- Activating the Nucleic Acid-Sensing Machinery for Anticancer Immunity
- Cytosolic Nucleic Acid Sensors in Inflammatory and Autoimmune Disorders
