

EMERGING AND REEMERGING VIRAL PATHOGENS

Volume 1

Fundamental and Basic Virology Aspects of Human,
Animal and Plant Pathogens

Edited by **Moulay Mustapha Ennaji**, BSc, MSc, PhD

Professor of Virology and Biotechnology, Head of Laboratory of Virology Microbiology, Quality, Biotechnologies/Eco-Toxicology, and Biodiversity, Faculty of Sciences and Techniques, Mohammeda, University Hassan II of Casablanca, Casablanca, Morocco

Emerging and Reemerging Viral Pathogens: Volume 1: Fundamental and Basic Virology Aspects of Human, Animal, and Plant Pathogens presents both new research information about the viruses and their impact to the scientific community, as provides a reference book on these viruses in human, animal, and vegetal as well as interspecies interaction filed to the scientific community, focusing on these three main axes: the drug, vaccine, and bioinformatical strategies against these viruses. It gives the reader a smooth understanding in the transmission of the consolidated information. The book creates awareness that the appearance of new transmissible pathogens is a global risk and highlights the need to adopt shared policies for the prevention and control of infectious diseases.

Key Features:

- Provide fundamental aspects of major risk virus affecting the human life today
- Covers most emerging viral disease in human, animal, and plant
- Creates awareness that the appearance of new transmissible pathogens is a global risk
- Highlights the need to adopt shared policies for the prevention and control of infectious diseases
