

Written by experienced bioscience educators, *Study and Communication Skills for the Biosciences* is an invaluable guide to getting the most out of your degree, and enhancing your employability skills. The motivational writing style and the wide range of key skills it covers make this book essential reading for all bioscience students.

What students said about the last edition:

'All in all, a very useful addition to your reading list. Great to dip in and out of or even read the summer before starting university.'

Emma Rengasamy, Cardiff University

'This is an excellent text that can serve not only as a textbook for the lower years but also as an accurate reference in the future. It is concise, coherent and well-rounded.'

Jacky Zhao, University of Cambridge

'It's the perfect text to bridge the gap between prior study and undergraduate level, without sounding patronising or condescending.'

Bethany Richmond, University of Warwick

'For advice on posters and presentations this book is top notch, and the online resources complement the advice in the text very well. The exam advice seems really simple but is very effective; great to show different ways of tackling revision and questions.'

Richard Guthrie, University of the West of Scotland

New to this edition

Now includes:

- How best to use recorded lectures in learning and revision
- How to get the most out of flipped classrooms and interactive lectures
- How to perform well in a video interview
- How best to use online networks for career advancement
- How to critically review a research paper

- A new learning feature, 'Try this', shows how you can apply the book's principles to your own life and studies.
