

'This book is a great revision guide with a number of revision tools...I would definitely recommend it and use it myself'

Fatine Barrijal, Student in Biomedical Science/Healthcare Science, University of Sunderland

'An exceptionally valuable resource and addition to the series of books'

Sebastian Prisacariu, Student in Biochemistry, University of St Andrews

'An excellent resource that I would recommend to anyone doing an introductory course in immunology'

Alexey Morgunov, Student in Molecular Biology, University of Cambridge

THE REVISION GUIDES THAT HELP YOU THRIVE IN THE BIOSCIENCES

The **Thrive in Bioscience** series is written to help you achieve exam success in all core areas of bioscience.

- Written by highly experienced educators to give you the best possible support during your learning and exam preparation
- A clear, bulleted presentation makes the facts quick and easy to assimilate
- Easy-to-digest artwork reinforces the key points made in the text
- Revision tips and 'Looking for extra marks?' panels show you how best to demonstrate your understanding
- In-text questions, and an online flashcard glossary and multiple-choice questions help you check your understanding topic-by-topic
