

"While other works have highlighted the current status of invasion ecology, this book seeks to put an emphasis on management and policy that can be created to begin to mitigate the many issues of biological invasions. Satisfying, exciting, and incorporating an astonishing variety of scholars and traditions, *Invasive Species in a Globalized World* provides an adequate background in invasion ecology and then steers the topic toward policy in an effective way. This is a crucial and currently lacking segment along the pathway from research to action."

JULIE L. LOCKWOOD, COAUTHOR OF *AVIAN INVASIONS: THE ECOLOGY AND EVOLUTION OF EXOTIC BIRDS AND INVASION ECOLOGY*

"*Invasive Species in a Globalized World* is an exciting, multifaceted approach to an overwhelming, urgent problem. It has something for everyone: ecology of important invaders, updates on management efforts, costs of invasions and management, politics and laws, and social attitudes about invasions and their impacts."

DANIEL SIMBERLOFF, AUTHOR OF *INVASIVE SPECIES: WHAT EVERYONE NEEDS TO KNOW* AND SENIOR EDITOR OF *ENCYCLOPEDIA OF BIOLOGICAL INVASIONS*

"Although much progress has been made in studies of biological invasions in recent years, effective management of invasive species remains a daunting challenge. What is clear is that effective responses demand insights from multiple disciplines. The essays collected in this book provide a very helpful primer of progress and perspectives in this regard."

DAVID N. RICHARDSON, DIRECTOR, DST-NRF CENTRE OF EXCELLENCE FOR INVASION BIOLOGY, STELLENBOSCH UNIVERSITY, SOUTH AFRICA, EDITOR OF *FIFTY YEARS OF INVASION ECOLOGY: THE LEGACY OF CHARLES ELTON*

Reuben P. Keller is assistant professor of environmental science at Loyola University Chicago and is coeditor of *Bioeconomics of Invasive Species: Integrating Ecology, Economics, Policy and Management*. **Marc W. Cadotte** is the TD Professor of Urban Forest Conservation and Biology at the University of Toronto Scarborough and coeditor of *Conceptual Ecology and Invasion Biology: Reciprocal Approaches to Nature*. **Glenn Sandiford** lives in Ithaca, NY, where he is collaborating with researchers in the Human Dimensions of Natural Resources unit at Cornell University.
