

"Jonathan Silvertown writes with grace and wit about one of the most important issues of our time. Drawing from the most up-to-date aging research and his personal and very sympathetic observations on the human condition, Silvertown makes the science of longevity accessible to the lay reader and insightful to the practitioner—a book that will be a pleasurable and informative read for everyone." ROBERT E. RICKLEFS, author of *The Economy of Nature*

Praise for Jonathan Silvertown

AN ORCHARD INVISIBLE

"A fabulous book.... Jonathan Silvertown's skills are in telling stories. Expect wonders, too.... In this book, Silvertown has produced a gem.... Read it as a gardener, scientist, food aficionado, historian, botanist, or naturalist, and you'll not be disappointed." *Times Higher Education*

"Seeds may look small and boring, yet tricks, bribes, and devious deceptions lie at the heart of their evolution, as ecologist Jonathan Silvertown entertainingly recounts in this fascinating celebration of the green world upon which all human life depends." *New Scientist*, Best Books of the Year

DEMONS IN EDEN

"Silvertown's enthusiasm for scientific sleuthing is infectious." *Science*

"Silvertown has a knack for explaining complex biological concepts in an accessible and engaging way. He deftly uses analogy and example to illustrate his discussions, and often waxes lyrical in his descriptions." *American Gardener*

"In this highly readable and pleasantly anecdotal account of the dynamics of the plant world, Silvertown suggests that tasting the fruit of evolutionary knowledge may provide us with a ticket for readmission to the Garden of Eden, where we can exercise the privilege by ensuring that biodiversity is conserved. Let us hope that he is right." *Nature*
