

EXPLORE THE World of the Cell!

Becker's World of the Cell provides a beautifully illustrated, up-to-date introduction to cell biology concepts, processes, and applications. Informed by many years of classroom experience in the cell biology course, this dramatically revised **Ninth Edition** introduces molecular genetics concepts earlier in the text and includes more extensive coverage of key techniques in each chapter. The authors provide accessible and authoritative descriptions of all major principles, as well as unique scientific insights into visualization and applications of cell and molecular biology.

Personalize your learning with MasteringBiology™

MasteringBiology is an online homework, tutorial, and assessment program that is proven to improve student performance. Highlights of assignment options for the Ninth Edition include:

- Reading Quizzes for each chapter help students stay on track with reading assignments
- Selected End-of-Chapter Problems can be assigned and automatically graded
- Molecular Model Structural Tutorials help students visualize 3-D structures
- Over 100 Tutorials and Activities teach complex cell processes
- Over 100 Molecular and Microscopy Videos provide vivid images of cellular processes
