

ROUTLEDGE
HANDBOOKS

"The *Routledge Handbook of Biodiversity and the Law*, edited by Charles R. McManis and Burton Ong, is required reading for lawyers, scholars and policy-makers for the most recent comprehensive scholarship on a broad spectrum of issues relating to biodiversity. In one single volume world renowned environmental law scholars examine cutting edge issues ranging from genetic resources, biosecurity, access and benefit sharing, synthetic biology, intellectual property, cultural heritage, conservation and sustainable use of marine biodiversity, indigenous peoples human rights and more. This will clearly become a 'must have' reference book."

— **Dr. Nilufer Oral**, Law Faculty, Istanbul Bilgi University, Turkey

"This book illuminates the complex set of legal issues surrounding biodiversity by examining them from a wide range of different perspectives. The editors are to be commended for the incredibly rich, varied, and informative scholarship that they have brought together in one volume."

— **Professor Graeme B. Dinwoodie**, University of Oxford, UK

This volume provides a reference textbook and comprehensive compilation of multifaceted perspectives on the legal issues arising from the conservation and exploitation of non-human biological resources. Contributors include leading academics, policy-makers and practitioners reviewing a range of socio-legal issues concerning the relationships between humankind and the natural world.

The *Routledge Handbook of Biodiversity and the Law* includes chapters on fundamental and cutting-edge issues, including discussion of major legal instruments such as the Convention on Biological Diversity and the Nagoya Protocol.

The book is divided into six distinct parts based around the major objectives which have emerged from legal frameworks concerned with protecting biodiversity. Following introductory chapters, Part II examines issues relating to conservation and sustainable use of biodiversity, with Part III focusing on access and benefit-sharing. Part IV discusses legal issues associated with the protection of traditional knowledge, cultural heritage and indigenous human rights. Parts V and VI focus on a selection of intellectual property issues connected to the commercial exploitation of biological resources, and analyse ethical issues, including viewpoints from economic, ethnobotanical, pharmaceutical and other scientific industry perspectives.

Charles R. McManis is the former Thomas and Karole Green Professor of Law Emeritus and former Director of the Intellectual Property and Technology Law Program at Washington University in St. Louis, Missouri, USA. His book, *Intellectual Property and Unfair Competition in a Nutshell*, is now in its seventh edition. He is also co-author of *Licensing Intellectual Property in the Information Age*, the second edition of which was published in 2005.

Burton Ong is Associate Professor in the Faculty of Law at the National University of Singapore, where he was Deputy Director of the Asia-Pacific Centre for Environmental Law between 2014 and 2017. He teaches and researches in the areas of Competition Law, Intellectual Property and Contract Law. He is the editor of *Intellectual Property and Biological Resources* (2004) and has an interest in the biodiversity and wildlife laws of the ASEAN member countries.
