

"This is the book I would have loved to have available when I was teaching."

FROM THE FOREWORD BY JOHN C. HOLMES, UNIVERSITY OF ALBERTA, CANADA

"This new edition will be a wonderful resource for teachers of undergraduate parasitology courses. The well-illustrated and easy-to-read text is unrivalled at the moment and will be a great tool to turn on a new generation of young minds to the wonders of parasitic organisms. A true parasitological tour de force!"

ROBERT POULIN, UNIVERSITY OF OTAGO, NEW ZEALAND

"This is an extremely well-written book that does an excellent job of integrating conceptual and organismal aspects of parasitology."

DALE H. CLAYTON, UNIVERSITY OF UTAH, USA

"Their approach is synthetic, refreshingly original and effectively blends coverage of long-standing fundamentals of parasitology with modern advances in the field."

JANINE N. CAIRA, UNIVERSITY OF CONNECTICUT, USA

Thoroughly revised to meet the needs of a new generation of parasitology students, whether their interest is in ecology, conservation biology, evolution, immunology, or health sciences

Synthesizes advances in the ecology and evolution of animal parasites against a backdrop of developments in parasite systematics, biodiversity, and life cycles

Explains the complexity and diversity of parasitology using a minimum of jargon and mathematical detail

Richly illustrated with over 300 figures (also available online at www.cambridge.org/parasitism) and numerous case study boxes to aid and encourage learning

Cover illustration: highlighting the diversity of parasitic animals. Photographs: a *Leucochloridium macrostomum*-infected snail (photograph by Joseph Hlášek) and a *Myrmeconema neotropicum*-infected ant (Stephen Yanoviak). Micrographs: the mite *Geckobia bataviensis* (David Walter); the protists *Trypanosoma cruzi* (Cheryl Davis) and *Giardia muris* (Břetislav Koudela); the cestodes *Anoplocephala perfoliata* (Douglas Colwell) and *Rhinebothrium megacanthophallus* (Claire Healy); the nematode *Heligmosomoides polygyrus* (Douglas Colwell); and the myxozoan *Myxobolus* sp. (Christopher Whipps).
