Problems Book

THE AUTHORS

The Problems Book helps students appreciate the ways in which experiments and simple calculations can lead to an understanding of how cells work by introducing the experimental foundation of cell and molecular biology. Each chapter reviews key terms, tests for understanding basic concepts, and poses research-based problems. *The Problems Book* has been designed to correspond with the first twenty chapters of *Molecular Biology of the Cell*, Sixth Edition.

- Contains over 1800 problems and their solutions.
- Illustrations are now in color.
- Includes the solutions to the end-of-chapter problems in the textbook *Molecular Biology of the Cell*, Sixth Edition
- Contains two new features for students preparing for careers in medicine:
 - MCAT-STYLE problems give students practice at solving challenging biological problems contained in standardized medical school entrance examinations.
 - MEDICAL LINKS sections contain problems of particular interest to health science students.
- The problems are organized into the following categories:
Terms to Learn, Definitions, True/False, Thought Problems, Calculations, Data Handling, Medical Links, MCAT-Style Problems
