

Molecular Biology: Structure and Dynamics of Genomes and Proteomes

illustrates the essential principles behind the transmission and expression of genetic information at the level of DNA, RNA, and proteins. This textbook emphasizes the experimental basis of discovery and the most recent advances in the field. For students taking an advanced undergraduate or graduate-level course, it presents a structural, mechanistic understanding of molecular biology.

Jordanka Zlatanova is Professor Emeritus in the Department of Molecular Biology at the University of Wyoming. She earned her PhD and DSc degrees in Cellular and Molecular Biology from the Bulgarian Academy of Sciences.

Kensal E. van Holde is Distinguished Professor Emeritus in the Department of Biochemistry and Biophysics at Oregon State University. He earned his PhD in Physical Chemistry at the University of Wisconsin—Madison.
