

Mabberley's Plant-book is internationally accepted as an essential reference text for anyone studying, growing or writing about plants. With some 26,000 entries, this comprehensive dictionary provides information on every family and genus of seed-bearing plant (including conifers), as well as ferns and clubmosses, and economically important mosses and algae. The book combines taxonomic details and uses with English and other vernacular names found in commerce. In this new edition, each entry has been updated to take into consideration the most recent literature, notably the greater understanding resulting from molecular analyses; over 1400 additional entries (including ecologically and economically important genera of seaweeds) have been included, ensuring that Mabberley's Plant-book continues to rank among the most practical and authoritative botanical texts available.

PROFESSOR DAVID J. MABBERLEY AM is an Emeritus Fellow of Wadham College, University of Oxford. He was consecutively Director of the University of Washington Botanic Gardens, Seattle, USA; Keeper of the Herbarium, Library, Art and Archives, Royal Botanic Gardens Kew, UK; and Executive Director, Royal Botanic Gardens Sydney, Australia. He is Professor Extraordinary at Universiteit Leiden, The Netherlands, Adjunct Professor, Macquarie University Sydney, and Honorary Research Associate, National Herbarium of New South Wales, Sydney. He has received numerous awards for his work and the third edition of Mabberley's Plant-book was recognised in the American Botanical Council's annual James A. Duke Excellence in Botanical Literature Award for 2008 and the International Association for Plant Taxonomy's Engler Medal in Silver 2009.

FROM REVIEWS OF EARLIER EDITIONS

'No one working seriously with living vascular plants should be without a copy.'

Choice

'D.J. Mabberley and his wondrous Plant-Book ... being all encompassing and indispensable, the botanical equivalent of Johnson's Dictionary'

Tim Flannery, *The New York Review of Books*

'The Plant-book is now widely established as a classic botanical work and an essential reference for any person, professional or amateur ... recommended as an essential and modern reference for anyone interested in botany.'

New Zealand Journal of Botany

'...in a class of its own...an indispensable resource that belongs on every plant lover's shelf, to be consulted often and to be enjoyed.'

The Plantsman, Royal Horticultural Society
