

Harmful Algal Blooms

A Compendium Desk Reference

Editors

**Sandra E. Shumway, JoAnn M. Burkholder,
and Steve L. Morton**

Harmful Algal Blooms: A Compendium Desk Reference provides basic information on harmful algal blooms (HAB) and references for individuals in need of technical information when faced with unexpected or unknown harmful algal events. Chapters in this volume will provide readers with information on causes of HAB, successful management and monitoring programs, control, prevention, and mitigation strategies, economic consequences of HAB, associated risks to human health, impacts of HAB on food webs and ecosystems, and detailed information on the most common HAB species.

Harmful Algal Blooms: A Compendium Desk Reference will be an invaluable resource to managers, newcomers to the field, those who do not have easy or affordable access to scientific literature, and individuals who simply do not know where to begin searching for the information needed, especially when faced with novel and unexpected HAB events.

Edited by three of the world's leading harmful algal researchers and with contributions from leading experts, *Harmful Algal Blooms: A Compendium Desk Reference* will be a key source of information for this increasingly important topic.

Sandra E. Shumway, University of Connecticut, Groton, CT, USA

JoAnn M. Burkholder, North Carolina State University, USA

Steve L. Morton, NOAA National Ocean Service, USA
