

The *Essentials* are an international, best-selling series of textbooks, all of which are designed to support lecture series or themes on core topics within the health sciences. See www.wileyessential.com for further details.

Essential Reproduction provides an accessible account of the fundamentals of reproduction within the context of cutting-edge knowledge and examples of its application. The eighth edition of this internationally best-selling title provides a multidisciplinary approach integrating anatomy, physiology, genetics, behaviour, biochemistry, molecular biology and clinical science, to give thorough coverage of the study of mammalian reproduction.

Key features:

- Contains discussion of the latest on conceptual, informational and applied aspects of reproduction
- New pedagogical features such as clinical case studies at the end of each chapter
- Better use of boxed material to improve separation of narrative text from ancillary information
- Highlighted key words for ease of reference relate to summary of key points
- Introduction now split into two sections
- Expanded content in Fetal challenges and Society and reproduction chapters
- Substantial rearrangement and updating in Making sperm, Controlling fertility and Restoring fertility chapters

A companion website is available at www.essentialreproduction.com featuring clinical cases, MCQs, and all of the illustrations and photographs within the book.
