

Extending the definition of ecology to encompass social relations and human subjectivity as well as environmental concerns, *The Three Ecologies* argues that the ecological crises that threaten our planet are the direct result of the expansion of a new form of capitalism and that a new ecosophical approach must be found which respects the differences between all living systems. A powerful critique of capitalism and a manifesto for a new way of thinking, the book is also an ideal introduction to the work of one of Europe's most radical thinkers.

FÉLIX GUATTARI (1930–1992) was a French psychoanalyst, philosopher, social theorist and radical activist. He is best known for his collaborative work with Gilles Deleuze.
