BEAST AND MAN

The Roots of Human Nature

Mary Midgley

"Are people different from animals? Or, if people are animals, are they at least a *higher* form of animal? Is the chief difference between 'beast' and 'man' something called 'intelligence,' which, in man, has gradually replaced mere 'instinct'? Mary Midgley, an English philosopher with one foot in the Old Testament and the other in the works of Konrad Lorenz, says no (though in elegantly qualified ways) to all these questions. She also refutes, in this lively and accessible essay, a host of what she believes are dangerously, sometimes willfully simplified theories about man's nature—on the part of biologists, psychologists and other social scientists, and some of the major philosophers of the past two centuries." — *Atlantic Monthly*

"This book is a stouthearted and stimulating effort to bring biology and philosophy together. Scientists, too, must applaud any philosophical treatise which starts from the material world (so rare since Descartes) and works its way in toward the mind of man, rather than attempting to impose that mind upon reality. Aristotle, too, would be pleased." — *Perspectives in Biology and Medicine*

"Midgley is one of the first philosophers to appreciate the potentially profound implications of Darwinism for her field, and to use the comparative method to analyze human behavior. Her book is a pioneering effort to open a dialogue with sociobiologists, rather than to defend her field against them." — *Bioscience*

"The range and depth of *Beast and Man* cannot be exaggerated, and its intelligent, timely, humane commentary on the nature of human nature has wide interdisciplinary appeal." — *Queen's Quarterly*

"Mary Midgley is a rare philosopher who has learned enough evolutionary biology to understand its deepest layer of meaning. In *Beast and Man* she has met the biologists on their own ground, identified the subjects in animal behavior of most significance to the social sciences and humanities, and presented sharp challenges that will add to the basis of the future dialogue." — Edward O. Wilson
