

Veronica Sanda Chedea received her Masters of Science degree in Biotechnology from Mediterranean Agronomic Institute of Chania in Greece in 2004. She received her doctorate in Biotechnology from the University of Agricultural Sciences and Veterinary Medicine in Cluj-Napoca, Romania in 2009. She has been awarded several prestigious post-doctoral fellowships from the Romanian Ministry of Education and Research, Royal Society UK, and Japan Society for the Promotion of Science (JSPS). Her expertise includes polyphenols' analysis and antioxidant/prooxidant activity in model solutions, as lipoxygenase inhibitors, as well as *in vitro* and more recently *in vivo* as feed components for farm animal nutrition. Dr. Chedea has published her scientific contributions in several national and international journals such as: *Food Chemistry*, *Phytochemistry*, and *Journal of Food Biochemistry*. She is also a reviewer for journals such as *Food Chemistry*, *Food Research International*, *Journal of Food Biochemistry*, *Crystal Growth & Design*, *Energy & Fuels*, *African Journal of Food Science*, *Journal of Bionic Engineering*, *Journal of Photochemistry and Photobiology B: Biology*, *Journal of the Serbian Chemical Society*, *African Journal of Pharmacy and Pharmacology*, *Journal of Toxicology*, *European Food Research and Technology*, *Applied Biochemistry and Biotechnology*, and *Waste and Biomass Valorization*.
