

The Making of Species

Douglas Dewar & Frank Finn

This book, originally published near the start of the twentieth century, was written with two aims in mind. In the first place, the authors attempted to place before the general public in simple language a true statement of the then-present position of biological science. In the second place, they endeavoured to furnish the scientific men of the day with food for reflection.

The logo for Nova Science Publishers features a stylized orange arrow that curves from the bottom left towards the top right. Below the arrow, the word "nova" is written in a bold, teal, sans-serif font. Underneath "nova", the words "science publishers" are written in a smaller, orange, sans-serif font. At the bottom of the logo, the website address "www.novapublishers.com" is displayed in white text within a red rounded rectangular box.
