

PLANT SCIENCES REVIEWS 2012

EDITED BY **DAVID HEMMING**

Plant Sciences Reviews 2012 provides scientists and students with analysis on key topics in current research, including plant diseases, genetics, climate impacts, biofuels and postharvest. Experts such as Frances Seymour, Roger Jones, Paul Christou and Errol Hewett provide incisive reviews of their fields. Originally published online in *CAB Reviews*, this volume makes available in printed form the reviews in plant science published during 2012.

Subjects covered include:

- Nutritional properties of plants: antioxidants, vitamin E and the health impacts of olive oil
- Influence of climate change on plant disease infections and epidemics
- The potential of bioenergy for developing countries
- Biofuels: potential crops, managing crops and the food versus fuel debate
- Using metabolomics to improve the quality of harvested fruit
- High-value horticulture in developing countries: barriers and opportunities
- Insecticide resistance and control failure
