

Biophysical Chemistry

Contents:

Liquid Crystal: Introduction • History • Liquid Crystal Phases • Thermotropic Liquid Crystals • Lyotropic Liquid Crystals • Metallotropic Liquid Crystals • Biological Liquid Crystals • Pattern Formation in Liquid Crystals • Theoretical Treatment of Liquid Crystals • Order Parameter • Bionics • Protein Design • Self-replication • Cucurbituril • Cyclophane

Metallacycle: Nomenclature • Classes of Metallacycles • Functional Group • Ether • Coagulation • Enzyme • Cofactor

Enzyme Catalysis: Induced Fit • Catalysis by Induced Fit • Inorganic Chemistry • Catalysis

Phagocytosis: In Immune System • In Apoptosis • In Protists • Bacterial Cell Structure • The Gram Positive Cell Wall • The Gram Negative Cell Wall • Other Bacterial Surface Structures • Ribosomes and other Multiprotein Complexes • Cell Adhesion • Epithelium

Elasticity of Cell Membranes: Elasticity of Lipid Vesicles • Elasticity of Open Lipid Membranes • Elasticity of Cell Membranes • Stacking • Carboxylic Acid • Physical Properties • Synthesis

Acyl Chloride: Nomenclature • Properties • Synthesis • Reactions • Amide • Ester • Ruthenium • Photochemistry

General Properties of the Cycloalkanes: Introduction • Nomenclature • Properties • Ring Strain

• Reactions • Monosaccharides • Glucosamine • Sialic Acid • N-Acetylglucosamine • Antibiotics and Drugs • Beyond Antibiotics: Treating Multi-drug-resistant Bacteria • Beyond Antibiotics: Treating Non-bacterial Infections • Principles of Molecular Evolution • Hypothetical Types of Biochemistry

About the Editor

Benedict Bricker is an Analytical Chemist and long-time contributor of the Statistics in Analytical Chemistry articles. He developed a Quality Assurance Training Programme in Analytical Chemistry and continues to deliver these courses. As part of the Valid Analytical Measurement (VAM) programme, he also developed courses in analytical science appropriate for A-level chemistry teachers and a Proficiency Testing (PT) competition for the students. Over the last ten years, he has lectured extensively on quality assurance topics and has co-authored a number of papers, books and guides.
