

An easy-to-use identification guide to 280 bird species, including all resident and regular migratory species occurring in Singapore.

- For each species, the authoritative text describes identifying features, subspecies, distribution, habits and habitats, sites where it is most likely seen and key conservation issues
- Size, common and scientific names, plus Chinese and Malay names listed
- Overview of geography and climate, habitats and bird communities, bird conservation, identification and photography tips, and the main birdwatching sites
- Includes a complete checklist of the birds of Singapore with their local and global conservation status

Yong Ding Li is vice-chair of the Southeast Asian Biodiversity Society and committee member of the Nature Society (Singapore)'s bird group. He is currently pursuing a PhD in biodiversity conservation at the Australian National University. Ding Li has published many research papers on birds, conservation and ecology. He also advises the IUCN SSC on Southeast Asian birds.

Lim Kim Chuah is a committee member of the Nature Society (Singapore)'s bird group and one of the most experienced birdwatchers in Singapore, with over 30 years of field experience in the country and across Asia. He has written many papers and books on Singapore's bird fauna.

Lead photographer Lee Tiah Khee is a professional with over 25 years of experience. He is one of Singapore's top nature photographers and has won numerous accolades, including the Singapore International Photography award and the prestigious Young Artist Award in Photography in 1992.
