

ISBN: 978-3-527-33195-6
and also available as set
(ISBN: 978-3-527-33245-8)

Eedited by a renowned and much cited chemist, this book covers the whole span of molecular computers that are based on biomolecules. The contributions by all the major scientists in the field provide an excellent overview of the latest developments in this rapidly expanding area. A must-have for all researchers working on this very hot topic.

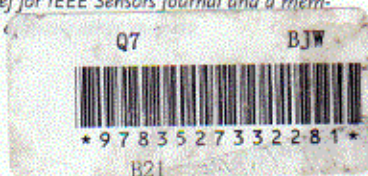

Perfectly complements *Molecular and Supramolecular Information Processing*, also by Professor Katz, and available as a two-volume set.

From the contents:

- Peptide Based Computation: Switches, Gates and Simple Arithmetic
- Enzyme-Logic Digital Biosensors for Biomedical Applications
- Information Security Applications Based on Biomolecular Systems
- Biocomputing: Explore its Realization and Intelligent Logic Detection
- Biologically Relevant Molecular Finite Automata
- In Vivo Information Processing Using RNA Interference
- Biomolecular Computing Systems
- Enumeration Approach to the Analysis of Interacting Nucleic Acid Strands
- The Logic of Decision-Making in Environmental Bacteria
- Qualitative and Quantitative Aspects of a Model for Processes Inspired by the Functioning of the Living Cell
- Computational Methods for Quantitative Submodel Comparison
- and more

Evgeny Katz received his Ph.D. in Chemistry from Frumkin Institute of Electrochemistry (Moscow) in 1983. He was a senior researcher in the Institute of Photosynthesis (Pushchino), Russian Academy of Sciences (1983-1991), a Humboldt fellow at Technische Universität München (Germany) (1992-1993), and a research associate professor at the Hebrew University of Jerusalem (1993-2006). Since 2006 he is Milton Kerker Chaired Professor at the Department of Chemistry and Biomolecular Science, Clarkson University, NY (USA). He has (co)authored over 300 papers in the areas of biocomputing, bioelectronics, biosensors and biofuel cells (Hirsch-index 65). Professor Katz serves as Editor-in-Chief for IEEE Sensors Journal and a member of editorial boards.
