

This book is the ninth volume of *Catalogue of Chinese Coleoptera*, including three families, Vesperidae, Disteniidae and Cerambycidae. It followed the system of Bouchard *et al.* (2011), placing all cerambycoids under the superfamily Chrysomeloidea, using the international entomological catalogue to record all longicorn species distributing in China. All literatures before 2019 are included. Three families, 10 subfamilies, 83 tribes, 641 genera and 3,681 species/subspecies are included in this book. The tribes under subfamilies, the genera under tribes and the species/subspecies under genera are presented alphabetically.

The contents of this book are listed as following. Vesperidae includes 1 tribe, 4 genera and 13 species/subspecies; Disteniidae includes 3 tribes, 8 genera and 31 species; Parandrinae includes 1 tribe, 1 genus and 2 species; Prioninae includes 7 tribes, 33 genera and 117 species/subspecies; Lepturinae includes 9 tribes, 93 genera and 566 species/subspecies; Necydalinae includes 1 tribe, 2 genera and 25 species/subspecies; Spondylidinae includes 4 tribes, 8 genera and 33 species/subspecies; Dorcasominae includes 1 tribe, 5 genera and 20 species/subspecies; Cerambycinae includes 28 tribes, 180 genera and 1,238 species/subspecies; and Lamiinae includes 28 tribes, 307 genera and 1,636 species/subspecies.
