

牛津大学出版百年旗舰产品
权威英文版本原汁原味呈现
资深编辑专为阅读进阶定制
文学评论名家妙趣横生解读

每册书附含:

- 名家导读
- 作家年表
- 词汇解析
- 背景知识拓展
- 同步阅读导引

In *On the Origin of Species* (1859) Darwin challenged many of the most deeply held beliefs of the Western world. His insistence on the immense length of the past and on the abundance of life-forms, present and extinct, dislodged man from his central position in creation and called into question the role of the Creator. He showed that new species are achieved by natural selection, and that absence of plan is an inherent part of the evolutionary process.

THIS EDITION INCLUDES

Introduction • Textual note • Bibliography • Chronology
Register of writers • Glossary of scientific terms • Index

With an Introduction and Notes by DAME GILLIAN BEER (Professor
Emeritus at the University of Cambridge)

ISBN 978-7-5447-5994-6
