

Virology

Virology is a fascinating and rapidly developing subject, and is worthy of study purely because viruses are interesting! There is a continuant need for trained virologists, and it is hoped that this book will play a small role to fulfil this need. This book is specially prepared to meet the demands on Zoology, Microbiology and Biotechnology UG and PG students of various Universities, it brings out the detailed information on introduction, history, classification, architecture, replication, pathogenesis, genetics, immunology, viral host interaction, bacteriophages, plant viruses, animal viruses, interferons, antiviral drugs, prions and viroids, virus genomes, vaccination, diagnostic methods and infection control measures.

Dr. A. Maharajan obtained his Ph.D. (ZoologyMarine Biology) from University of Madras, Chennai, under the guidance of *Dr. M. Vijayakumaran., Ph.D.,* Principal Scientist (Rtd.), Central Marine Fisheries Research Institute, Chennai and Co-ordinator, National Institute of Ocean Technology, Chennai. He has worked in various Research Institutes and Colleges for the last 12 years. Presently he is working as a Lecturer in Department of Microbiology, Udaya College of Arts and Science, Vellamodi, Tamil Nadu. He has to his credit more than 10 Research papers in various National and International journals and has also published 3 books. He is specialized in Zoology, Aquaculture, Marine Biology, Virology, Microbiology, Immunology and Toxicology fields.
