

**PIONEERS of
MICROBIOLOGY**
and the
NOBEL PRIZE

...The four main sections of the book are each a gem of a portrait in the miniature. The treatment is balanced: not only human greatness but failings are presented, making the descriptions very human and informative... Ulf Lagerkvist provides interesting data and observations about the nominations and the studies conducted by various members of the Committee on the candidates.

István Hargittai

Budapest University of Technology and Economics, Hungary

Lagerkvist has written an extremely informative and simple description of four giants in the field of microbiology. His easy-going style and a focus on the straightforward elements of the lives of the Nobelists make for a voyage of entertainment and education.

Sidney Altman

Yale University, USA

It is an informative review of the notable achievements of four great figures in medicine whose researches have virtually been eclipsed by the rapid advances of the 20th century.

Paul Berg

Stanford University Medical Center, USA
