

INTERNATIONAL REVIEW OF CYTOLOGY

A SURVEY OF CELL BIOLOGY Volume 206

Edited by

KWANG W. JEON

University of Tennessee, Knoxville, U.S.A.

International Review of Cytology presents current advances and comprehensive reviews in cell biology—both plant and animal. Articles address structure and control of gene expression, nucleocytoplasmic interactions, control of cell development and differentiation, and cell transformation and growth. Authored by some of the foremost scientists in the field, each volume provides up-to-date information and directions for future research.

Praise for the Series

"Should be on the shelf of any biomedical library"

DOODY'S

"Invaluable reading for all biologists."

NATURE

Contents Include

- Metabolic Regulation of pH in Plant Cells: Role of Cytoplasmic pH in Defense Reaction and Secondary Metabolism
- Freeze-Substitution: Origins and Applications
- Myosins in Protists
- Genetic Regulation of Gravitropism in Higher Plants
- Biology of Kidney Cells: Ontogeny-Recapitulating Phylogeny
- Circadian Rhythms in Microalgae
- Proadrenomedullin-Derived Peptides in the Paracrine Control of the Hypothalamo-Pituitary-Adrenal Axis
