1. Multiple Effector Mechanisms Induced by Recombinant *Listeria monocytogenes* Anticancer Immunotherapeutics

Anu Wallecha, Kyla Driscoll Carroll, Paulo Cesar Maciag, Sandra Rivera, Vafa Shahabi, and Yvonne Paterson

I. Introduction	2
II. Molecular Determinants of <i>L. monocytogenes</i> Virulence	3
A. Virulence factors associated with <i>L. monocytogenes</i> invasion	3
B. <i>L. monocytogenes</i> survival in the macrophage	4
III. Immune Response to <i>L. monocytogenes</i> Infection	6
A. Innate immunity	6
B. Cellular immune responses	8
IV. Recombinant <i>L. monocytogenes</i> as a Vaccine Vector	12
A. Construction of recombinant <i>L. monocytogenes</i> strains	12
B. LLO and ACTA as adjuvants in <i>L. monocytogenes</i> based immunotherapy	13
V. The Pleiotropic Effects of <i>L. monocytogenes</i> on the Tumor Microenvironment	14
A. Protective and therapeutic tumor immunity	14
B. <i>L. monocytogenes</i> promotes a favorable intratumoral milieu	15
C. Effect of <i>L. monocytogenes</i> vaccination on regulatory T cells in the tumors	18
D. Implication of the immune response to <i>L. monocytogenes</i> infection: <i>L. monocytogenes</i> within the tumor	19
VI. Conclusions and Future Prospects	19
References	20

2. Diagnosis of Clinically Relevant Fungi in Medicine and Veterinary Sciences

Olivier Sparagano and Sam Foggett

I. Introduction	30
A. The general structure of fungi	30
B. Clinically relevant species of fungi	32

II. Non molecular Methods of Fungal Diagnosis	36
A. Microscopy	36
B. Culture	38
C. UV wood's Lamp	39
D. Radiology	39
E. Spectroscopy	40
III. Molecular Techniques for Fungal Diagnosis	41
A. Polymerase chain reaction (PCR)	41
B. Serological methods	45
IV. Conclusion	47
References	48

3. Diversity in Bacterial Chemotactic Responses and Niche Adaptation

Lance D. Miller, Matthew H. Russell, and Gladys Alexandre

I. Introduction	54
II. Molecular Mechanisms of Bacterial Chemotaxis	55
A. Chemotaxis: Control of the motility pattern	55
B. Molecular mechanisms of chemotaxis: The <i>E. coli</i> paradigm	57
C. <i>Bacillus subtilis</i> , another model for chemotaxis signal transduction	59
III. Diversity in Chemotaxis	61
A. Complete genome sequencing projects and the diversity in chemotaxis	61
B. Chemotaxis in bacterial species colonizing diverse niches	63
IV. Characterizing the Chemotaxis Response: Qualitative and Quantitative Assays	64
A. Temporal gradient assays	65
B. Spatial gradient assays	66
C. Use of chemotaxis assays to characterize new microbial functions	70
V. Conclusions and Future Prospects	70
Acknowledgments	71
References	71

4. Cutinases: Properties and Industrial Applications

Tatiana Fontes Pio and Gabriela Alves Macedo

I. Introduction	78
II. Cutinase Characteristics	79
III. Applications of Cutinase	80
A. Oil and dairy products	82
B. Flavor compounds	83
C. Phenolic compounds production	84
D. Insecticide and pesticide degradation	85
E. Textile industry and laundry	86

F. Polymer chemistry	87
G. Enantioselective esterification reactions	89
H. Food industry	90
IV. Conclusion	91
Acknowledgements	91
References	91

5. Microbial Deterioration of Stone Monuments—An Updated Overview

Stefanie Scheerer, Otto Ortega-Morales, and Christine Gaylarde

I. Introduction	98
II. Microbial Ecology of Outdoor Stone Surfaces	99
A. Molecular biology in the study of epi- and endo-lithic microorganisms	101
B. Effect of climate and substrate on microflora	102
III. Mechanisms of Microbial Biodeterioration	105
A. Biofilms	106
B. Discoloration	107
C. Salting	109
D. Physical damage	110
E. Inorganic acids	110
F. Organic acids	111
G. Osmolytes	112
IV. Microorganisms Detected on Historic Monuments	112
A. Phototrophic microorganisms	112
B. Chemoorganotrophic microorganisms	120
C. Chemolithotrophic microorganisms	124
V. Control of Biodeteriorating Microorganisms	126
VI. Conclusions	127
References	128

6. Microbial Processes in Oil Fields: Culprits, Problems, and Opportunities

Noha Youssef, Mostafa S. Elshahed, and Michael J. McInerney

I. Introduction	142
II. Factors Governing Oil Recovery	144
III. Microbial Ecology of Oil Reservoirs	146
A. Origins of microorganisms recovered from oil reservoirs	147
B. Microorganisms isolated from oil reservoirs	148
C. Culture-independent analysis of microbial communities in oil reservoirs	155
IV. Deleterious Microbial Activities: Hydrogen Sulfide Production (or Souring)	163

A. Current souring control approaches	163
B. Microbial control of souring	164
V. Microbial Activities and Products Useful For Oil Recovery	167
A. Paraffin control	171
B. Biogenic acid, solvent, and gas production	181
C. Biosurfactant production	194
D. Emulsifiers	205
E. Exopolymer production and selective plugging	205
F. <i>In situ</i> hydrocarbon metabolism	211
VI. Implementation of Meor	214
A. Treatment strategies	214
B. Nutrients selection	217
C. Monitoring the success of MEOR field trials	218
VII. Current and Future Directions	218
A. Biosurfactant formulations	218
B. Understanding the microbial ecology of oil reservoirs	220
VIII. Conclusions	223
Acknowledgments	224
References	225
