Plant Responses to UV Radiation and Links to Pathogen Resistance

Bernard A. Kunz, David M. Cahill, Peter G. Mohr,
Megan J. Osmond, and Edward J. Vonarx

I. Introduction	2
II. UV Radiation Damage to Plant Cells	2
III. Protective and Repair Mechanisms for Plant Defense Against UV Radiation	6
IV. UV Radiation and Cross-Tolerance to Environmental Stress	20
V. Concluding Remarks	24
References	25

Roles of DNA Polymerases in Replication, Repair, and Recombination in Eukaryotes

Youri I. Pavlov, Polina V. Shcherbakova, and Igor B. Rogozin

I. Introduction	42
II. Classification and the Main Properties of Eukaryotic DNA Polymerases	43
III. Fidelity of DNA Polymerases on Undamaged and Damaged Templates	64
IV. Roles of DNA Polymerases in the Safeguarding of Genome Function	80
V. Human Diseases Caused by Aberrant Replication	102
VI. Conclusions and Future Perspectives	104
References	105

Sub-Second Cellular Dynamics: Time-Resolved Electron Microscopy and Functional Correlation

Helmut Plattner and Joachim Hentschel

I. Introduction.....	134
II. Analytical Methods	135
III. Problems Solved by Correlated Time-Resolved EM and Functional Analyses.....	153
IV. Other Methodology	160
V. Concluding Remarks	166
References	167

New Insights into Nucleolar Architecture and Activity

Ivan Raška, Peter J. Shaw, and Dušan Cmarko

I. Introduction.....	178
II. Historical Background	179
III. Ribosomal Genes.....	182
IV. Nucleolar Structure and Function.....	190
V. Concluding Remarks and Future Directions	216
References	218

Growth and Division of Peroxisomes

Michael Schrader and H. Dariush Fahimi

I. Introduction.....	237
II. Growth of Peroxisomes in Mammalian Cells and Tissues.....	242
III. Growth of Peroxisomes in Yeast	256
IV. Division of Peroxisomes.....	260
V. Concluding Remarks	274
References	275

Index.....	291
