

CONTENTS

Dedication	v
List of Contributors	ix
Preface	xv
1. The obese (<i>ob/ob</i>) mouse and the discovery of leptin	1
V. Daniel Castracane and Michael C. Henson	
2. Leptin receptors	11
Laura C. Schulz and Eric P. Widmaier	
3. Leptin and obesity	33
Lauren N. Bell and Robert V. Considine	
4. Leptin and neuroendocrinology	53
Abhiram Sahu	
5. Leptin-insulin interrelationships	79
Asha Thomas-Geevarghese and Robert Ratner	
6. Leptin and other endocrine systems	103
Robert V. Considine	
7. Leptin and immune function, inflammation and angiogenesis	125
Giuseppe Matarese, Claudio Procaccini and Veronica De Rosa	

8.	Leptin and bone: central control of bone metabolism by leptin	139
	Shu Takeda	
9.	Roles and regulation of leptin in reproduction	149
	Michael C. Henson and V. Daniel Castracane	
10.	Leptin and cardiovascular disease	183
	Kamal Rahmouni, Marcelo L. Correia and William G. Haynes	
11.	Leptin and cancer	201
	Delia-Marina Alexe and Eleni Petridou	
12.	Lipodystrophy: the experiment of nature to study leptin	225
	Rexford S. Ahima and Malaka B. Jackson	
13.	Pulsatile and diurnal leptin rhythms	247
	Luciana Ribeiro, João Vicente Busnello, Ma-Li Wong and Julio Licínio	
14.	Leptin in farm animals	263
	C. Richard Barb, Gary J. Hausman and Timothy G. Ramsay	
15.	Genetic disorders involving leptin and the leptin receptor	309
	I. S. Farooqi	
16.	Immunoassays for leptin and leptin receptors	319
	Jehangir Mistry	
17.	Clinical applications of leptin	327
	Elif Arioglu Oral and Alex M. DePaoli	
	Index	359
