

CONTENTS

	page
Contributors	ix
C. CHOTHIA	
Protein-protein and protein-carbohydrate recognition	1
D. J. EVANS	
Picornavirus receptors, tropism and pathogenesis	23
G. R. CORNELIS	
Cross-talk between <i>Yersinia</i> and eukaryotic cells	45
T. J. FOSTER, O. HARTFORD AND D. O'DONNELL	
Host-pathogen protein-protein interactions in <i>Staphylococcus</i>	67
M. VIRJI	
Mechanisms of microbial adhesion; the paradigm of <i>Neisseriae</i>	95
R. D. EVERETT	
Virus-host interactions in the control of the gene expression of nuclear replicating DNA viruses	111
J. KARN, N. J. KEEN, M. J. CHURCHER, F. ABOUL-ELA, G. VARANI AND M. J. GAIT	
Regulation of human immunodeficiency virus gene expression by Tat	129
M. E. WARD	
Chlamydia host and host cell interactions	153
C. J. DORMAN, N. C. NOLAN AND S. G. J. SMITH	
Control of type 1 fimbrial expression by a random genetic switch in <i>Escherichia coli</i>	191
M. B. MATHEWS	
Viruses and the protein synthesis machinery of the cell: offence, defence and dependence	211
G. TRAN VAN NHIEU, T. ADAMS, C. DEHIO, R. MÉNARD, A. SKOUDY, J. MOUNIER, R. HELLIO, P. GOUNON AND P. SANSONETTI	
Shigella-induced cytoskeletal reorganization during host cell invasion	237
R. LARTEY, S. GHOSHROY, J. SHENG AND V. CITOVSKY	
Transport through plasmodesmata and nuclear pores: cell-to-cell movement of plant viruses and nuclear import of <i>Agrobacterium</i> T-DNA	253

M. G. ROSSMANN	
Viral cell recognition and entry	281
B. B. FINLAY	
Enteropathogenic <i>E. coli</i> and <i>Salmonella</i> species exploitation of host cells	311
P. PALESE, P. WANG, T. WOLFF AND R. E. O'NEILL	
Host-viral protein-protein interactions in influenza virus replication	327
B. CAUGHEY	
Transmissible spongiform encephalopathies and the formation of protease-resistant prion protein	341
Index	357
