

CONTENTS

LIST OF CONTRIBUTORS	vii
PREFACE	
Derek LeRoith	xi
Chapter 1	
RECENT ADVANCES IN CYTOKINE SIGNAL TRANSDUCTION: LESSONS FROM GROWTH HORMONE AND OTHER CYTOKINES	
Stuart J. Frank and John J. O'Shea	1
Chapter 2	
SOMATOSTATIN AND ITS RECEPTORS	
Yogesh C. Patel and Coimbatore B. Srikant	43
Chapter 3	
BRAIN ANGIOTENSIN RECEPTOR SUBTYPES AND THEIR COUPLING TO DISTINCT SIGNAL TRANSDUCTION PATHWAYS	
Mohan K. Raizada, Di Lu, Hong Yang, Elaine M. Richards, Craig H. Gelband, and Colin Sumners	75
Chapter 4	
TARGETED MUTATIONS IN THE INSULIN SIGNALING PATHWAY UNRAVEL THE GENETICS OF DIABETES MELLITUS AND GROWTH IN MICE	
Domenico Accili and Yoshiaki Kido	103
Chapter 5	
TYROSINE PHOSPHORYLATION OF p125 ^{FAK} AND PAXILLIN BY CHOLECYSTOKININ AND OTHER NEUROPEPTIDES	
Luis J. García and Robert T. Jensen	119

Chapter 6MECHANISM OF INSULIN'S ABILITY TO POTENTIATE
MITOGENIC EFFECTS OF GROWTH FACTORS*Marc L. Goalstone, J. Wayne Leitner, and Boris Draznin*

155

Chapter 7

THE BIOLOGY OF INHIBIN AND ACTIVIN—AN UPDATE

Jorma Toppari, Olli Ritvos, and Ilpo Huhtaniemi

175

Chapter 8

CYTOKINES AND GROWTH FACTORS IN OVARIAN FUNCTION

Kenneth H.H. Wong and Eli Y. Adashi

207

Chapter 9THE CRUCIAL ROLES OF INSULINLIKE GROWTH
FACTOR-I AND GROWTH HORMONE IN
MAMMARY GLAND DEVELOPMENT*David L. Kleinberg and Weifeng Ruan*

227

INDEX
