
Contents

Contributors	vii
Preface to the Series	ix
Preface	xi
1 Fatty Acids—Structural Identification <i>F. D. Gunstone</i>	1
2 Triacylglycerol Biosynthesis <i>A. K. Stobart and S. Stymne</i>	19
3 Phospholipids <i>T. S. Moore</i>	47
4 Glycolipid Analyses and Synthesis in Plants <i>R. Douce, J. Joyard, M. A. Block and A.-J. Dorne</i>	71
5 Waxes, Cutin and Suberin <i>T. J. Walton</i>	105
6 Polyacetylenes and Related Compounds: Analytical and Chemical Methods <i>J. Lam and L. Hansen</i>	159
7 Phytochrome and Other Receptors <i>L. H. Pratt, H. Senger and P. Galland</i>	185
8 Absorption Techniques in the Study of Photosynthesis <i>P. Mathis</i>	231
9 Chlorophyll Fluorescence Transients <i>P. Horton and J. R. Bowyer</i>	259

10 Structure and Dynamics of Plant Membranes	297
<i>P. J. Quinn and W. P. Williams</i>	
Index	341
